INTERNATIONAL CONFERENCE ON SUSTAINABLE BUILT ENVIRONMENT (ICSBE)

23 - 24 February, 2023

The Built Environment sector is responsible for nearly 40% of carbon emissions and energy consumption, 50% of all extracted materials, 33% of water consumption and 35% of waste generated. A sustainable built environment addresses environmental-societal issues, including energy security, resilience, equity, water and waste management, health, and well-being. These issues are at the center of creating sustainable habitats and cities which are equitable and affordable to all sections of society.

This international conference looks to deliver multiple dialogues between academia, policymakers, institutions, industry, and society on the issues of education, policy framework, technology, innovations, partnerships, and governance in the context of a sustainable built environment.

This conference will include

- One-day academic conference [Keynote addresses, panel discussions and paper presentation]
- Half-day industry conference [Keynote address, panel discussions and networking opportunities]
- In addition, delegates participating in this one-and-a-half-day conference can register for a half-day Australia-India Council (AIC) Grants Program interactive panel discussion on education for achieving a net zero carbon-built environment. This event is hosted synchronously between Sydney and Noida and live-streamed worldwide [aibcnzero.wordpress.com/events/].

Conference Themes:

- Education for Sustainability and Capacity Building in the Built Environment sector
- Sustainable Urban Planning, Housing, Real Estate and Construction Practices
- Net Zero Built Environment agenda, progression, opportunities, and challenges
- Climate Change Policy, Legal Framework and Financing
- Technology and Innovation in Process and Products

Select papers from the conference will be published by Springer as a proceedings book volume in a SCOPUS indexed book series. Springer will conduct quality checks on the accepted papers and only papers that pass these checks will be published. Springer Nature does not charge any money for the publication of Non-Open Access content. Abstracts/extended abstracts and short papers (less than 4 pages) are not considered for publication.
